

DSC 423: Data Analysis and Regression

Course Information

Title: DSC 423: Data Analysis and Regression

Location: Online Only (d2l.depaul.edu)

Contact Information

Instructor: Jonathan Gemmell

Email: jgemmell@cdm.depaul.edu

Office Hours: See website. Please schedule 24 hours in advance.

Location: CDM 837 (243 S. Wabash)

Phone: +1 (312) 362 – 1361

Preferred Contact: email

Course Overview

Multiple regression and correlation, residual analysis, analysis of variance, and robustness -- These topics will be studied from a data analytic perspective, supported by an investigation of available statistical software.

Online Requirements

This is an online only course. You will need at minimum:

- Frequent access to a computer that connects to the Internet.
- A working e-mail account that you check regularly (and that is updated in Campus Connection)
- Access to a software suite such as Microsoft Office (Word, Excel, Power Point). If you do not have access to Office, you can download a free, open source alternative such as Open Office (<http://www.openoffice.org/>) that will give you the same basic functionality.
- Access to a computer with R and RStudio including administrator for installing packages.
- The ability to view video files, either in a streaming (Flash) or downloadable (mp4, mov) format.
- The ability to record videos with a camera and microphone.

Course Prerequisites

IT403. Students are expected to understand basic mathematical notation and be familiar with college algebra concepts.

Emails

I make every attempt to reply to emails within 24 hours. Include the course number, your name, and your student ID in the title of the email. Emails should be written in a professional manner with clear and concise language.

Attendance

As this is an online class, there is not a requirement for attendance. However, students must plan to interact with the class several times per week. Weekly activities will include 1) watching lectures, 2)

completing quizzes on the lectures, 3) watching tutorials, 4) completing activities based on the tutorials, 5) completing a reading and submitting a response to the discussion forums, 6) submitting a video response to the D2L, and 7) completing a project milestone. Additionally, requirements include completing assignments, a midterm and a final exam.

Course Management System

We will use DePaul University's Desire2Learn system (d2l.depaul.edu).

News Widget

The primary form of communication for this class will be the news widget on the D2L. Subscribe to the widget and ensure that DePaul has your correct email.

Forums

The class forum is the preferred place to ask questions about the class. If you have questions about a quiz question, the exams or lecture notes, please post them there. I read these frequently. All students should subscribe to the forums so that you receive email updates.

Textbook

(Recommended, but not required) Mendenhall and Sincich, Second Course in Regression Analysis, 8th Edition, Prentice Hall/Pearson, 2019. Older versions are acceptable.

Software

The statistical packages used in this course are R and RStudio. They are available in all DePaul labs. Tutorials using R will be presented every week.

Grades

Class Contract: 2%
Lecture Quizzes: 9%
Tutorial Activities: 9%
Assignments: 50%
Exams: 30%

Class Contract

All students must complete the class contract. It is meant to ensure that you have read the syllabus and understand the requirements for the course. The contract may be found under “quizzes” on the D2L.

Lecture Quizzes

There is a lecture quiz each week, requiring only a small amount of time. Quizzes may be taken as many as 10 times and only the highest grade is recorded. Quizzes are taken online through the D2L. The purpose of the quizzes is not to test your knowledge. You may (and are encouraged) to work through the problems with your fellow classmates, seek out the help of tutors, ask questions or even offer potential solutions on the forums. The purpose of the quizzes is to prepare you for the exams. The questions are indicative of what will be on the exam.

Tutorials Activities

There is one quiz tutorial per week. The tutorials are meant to give specific examples using R and experience working with real datasets. As with the quizzes, students are encouraged to work together on the tutorials. The tutorials may be taken as many as 10 times and only the highest grade is recorded. The tutorials are taken online through the quiz section of the D2L.

Assignments

There is an assignment due every week. Assignments must be completed independently. Whereas the quizzes and exam lean more theoretical, the tutorial activities and the assignments lean more practical. Assignments require students to prepare data, build models and draw insights from datasets.

Exams

There will be two exams. A take home midterm will be given during week six. The final exam will be given at the end of the quarter. The final exam may not be rescheduled except under extreme extenuating circumstances. The final exam is closed-book and closed -notes.

Please note that this course uses Examity to ensure the integrity of exams. The final exam will not be available to students unless the Examity system is used. Examity works with a web-camera and microphone either built-in or attached to the computer. These devices identify the student and capture video and audio throughout the exam. After completing the live-authentication process, Examity proctor support monitors the test-taker's surroundings and the entire desktop throughout the entire exam. Examity proctor support can comment and troubleshoot in real time during the test.

Please read the Examity instructions in D2L and schedule your exam.

All exam videos will be reviewed. If cheating is confirmed, the student will be referred to the Policy on Academic Dishonesty in the Student Handbook.

Late Policy

Late Quizzes receive 0 points without exception. Late assignments are penalized 1% per hour.

Final Grades

A:	90% - 100%
B:	80% - 90%
C:	70% - 80%
D:	60% - 70%
F:	less than 60%

Plusses and minuses are given for the upper and lower 3% in a letter's range. There is no A+. You may not pass the class if you do not receive a passing grade on the final exam and the final report.

Changes to Syllabus

This syllabus is subject to change as necessary during the quarter. If a change occurs, it will be thoroughly addressed during class, posted under Announcements in D2L and sent via email.

Plagiarism

Students in this course should be aware of the strong sanctions that can be imposed against someone guilty of plagiarism. If proven, a charge of plagiarism could result in an automatic F in the course and possible expulsion. The strongest of sanctions will be imposed on anyone who submits as his/her own work any assignment which has been prepared by someone else. If you have any questions or doubts about what plagiarism entails or how to properly acknowledge source materials be sure to consult the instructor.

Academic Integrity

Work done for this course must adhere to the University Academic Integrity Policy, which you can review in the Student Handbook or by visiting “Academic Integrity” (academicintegrity.depaul.edu) at DePaul University.

Academic Policies

All students are required to manage their class schedules each term in accordance with the deadlines for enrolling and withdrawing as indicated in the University Academic Calendar. Information on enrollment, withdrawal, grading and incompletes can be found at:

www.cdm.depaul.edu/Current%20Students/Pages/PoliciesandProcedures.aspx

Incomplete Grades

An incomplete grade is a special, temporary grade that may be assigned by an instructor when unforeseeable circumstances prevent a student from completing course requirements by the end of the term and when otherwise the student had a record of satisfactory progress in the course. All incomplete requests must be approved by the instructor of the course and a CDM Associate Dean. Only exceptions cases will receive such approval. Information about the Incomplete Grades policy can be found at:

www.cdm.depaul.edu/Current%20Students/Pages/Grading-Policies.aspx

Writing Center

Consider contacting or visiting the Writing Center to discuss your assignments for this course or any others. You may schedule appointments (30 or 50 minutes) on an as-needed or weekly basis, scheduling up to 3 hours worth of appointments per week. Online services include Feedback-by-Email and IM conferencing (with or without a webcam). All writing center services are free.

Writing Center tutors are specially selected and trained graduate and undergraduate students who can help you at almost any stage of your writing. They will not do your work for you, but they can help you focus and develop your ideas, review your drafts, and polish your writing. They can answer questions about grammar, mechanics, different kinds of writing styles, and documentation formats. They also can answer questions and provide feedback online, through IM/webcam chats and email. Obviously, the tutors won't necessarily be familiar with every class or subject, but they are able to provide valuable help from the perspective of an interested and careful reader as well as a serious and experienced student-writer.

Students with Disabilities

Students seeking disability-related accommodations are required to register with DePaul's Center for Students with Disabilities (CSD) enabling them to access accommodations and support services to assist with their success. There are two office locations:

- Loop Campus – Lewis Center #1420 – (312) 362-8002
- Lincoln Park Campus – Student Center #370 – (773) 325-1677

Students who register with the Center for Students with Disabilities are also invited to contact Dr. Gergory Moorhead, Director of the Center, privately to discuss how he may assist in facilitating the accommodations to be used in a course. This is best done early in the term. The conversation will remain confidential to the extent possible. Please see:

offices.depaul.edu/student-affairs/about/departments/Pages/csd.aspx

Schedule your appointments with enough time to think about and use the feedback you'll receive. Bring your assignment handout and other relevant materials to your appointments.

Student Evaluations

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. They are a requirement of the course and are key to continue to provide you with the highest quality of teaching. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is completely separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over three weeks. Students do not receive reminders once they complete the evaluation. Please see <https://resources.depaul.edu/teaching-commons/teaching/Pages/online-teaching-evaluations.aspx> for additional information.
